ARCHITECT

Inspire us...

FOR EACH  
PROJECT,  
UNIQUE  
PRODUCTS

One system...  
Infinite possibilities.

WHY  
CHOOSE  
HYLINE?

At HYLINE, we do not offer standard solutions – we develop exclusive systems.

# MINIMALISM IN THE ESSENCE OF ARCHITECTURE

“At HYLINE, we believe architecture begins with the finest details — often with those that go unseen.

HYLINE was founded with a clear ambition: to offer architects total design freedom through solutions that combine technical rigour, minimalist elegance and complete customization.

Our commitment is to be more than a technical specialist: we are creative partners and a work tool.

We collaborate with architects around the world to transform demanding ideas into discreet, sophisticated and technologically advanced solutions with high performance.

It is this relentless search for perfection - invisible but essential - that guides everything we do.”

Bruno Brás  
*President and Founder*

---

We listen, accept the challenge and develop.

This is how our products are born.

# WHAT INSPIRES US

---

## HYLINE DNA

We created HYLINE for those who seek more.

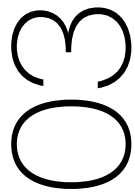

For architects who demand perfection in every detail – even the ones you cannot see.

We are a brand guided by rigor, precision and a vision: to integrate completely into the project, without noise, without distractions.

Just pure lines, natural light and solutions that intertwine with the architecture.

At HYLINE, we believe that the ideal frame is one that disappears – but leaves an unforgettable impression.

# OUR HISTORY OF EXCELLENCE

HYLINE - the effects of time

2008	<b>The dream begins...</b>	2015	Acquisition of the third industrial building- Esposende   Portugal.		Constitution of HYLINE BS UK, dedicated to the B2B market.	2021	Constitution of HYLINE BS USA.

More than a standard window system.

We make room  
for silence,  
for light  
and for time...

Brazil | Architect Tadu Arquitetura e Marénes Arquitetura | Photography André Klotz

## WE FOLLOW, WE CREATE, WE SURPRISE...

Every project begins with careful listening.

From the initial briefing to final installation, our technical and creative teams – in Portugal and internationally – work closely with architects, interior designers and clients to deliver precision at every stage.

We provide comprehensive on-site support, installer training, and a consistent presence throughout the process to ensure complete peace of mind.

But our commitment doesn't end when the project is complete. Through HX, we offer more than after-sales support – we provide a dedicated, detail-focused service that enhances the overall experience.

At HYLINE, we aim to be more than a supplier. We strive to be a trusted partner – not just for a single project, but for a lifetime of creating together.

HYLINE is more than a brand. It's a philosophy of architecture – defined by lightness, precision and elegance. Always alongside those who imagine the future.

Windows to infinity  
are inspired  
by freedom.

# WHEN THE PROJECT COME TO LIFE

Inspire us...

# FOR EACH PROJECT, UNIQUE PRODUCTS

Together, we make the invisible essential – and each project truly unique.

At HYLINE, we transform the invisible into the essential, crafting each project into a unique architectural statement.

We develop bespoke systems meticulously designed to realise and enhance the architect's vision.

Every project inspires us to create precise, tailored solutions that seamlessly meet its specific demands and aspirations.

By merging engineering excellence with innovative product design, we unlock extraordinary performance within the most subtle details.

Discreet frames amplify comfort, flood spaces with natural light, and expand architectural freedom.

Complexity drives our creativity, allowing us to showcase what distinguishes us:

the ability to customise, integrate, and elevate architecture through refined, innovative, and technically perfect solutions.

## HYLINE BUILDING SYSTEMS AFRICA

“Working closely with architects and clients, we've built partnerships grounded in trust, transparency, and shared ambition.

Every project is a co-creation — where ideas are challenged, visions are aligned, and solutions are shaped together.

It's this collaborative spirit that consistently transforms complex challenges into meaningful, enduring outcomes.”

*Mohamed Sayah, Africa Commercial Manager*

## HYLINE BUILDING SYSTEMS BRASIL

“Working at HYLINE means living our commitment to excellence every day.

Our attention to detail and technical rigor allow us to provide complete security to our customers and partners.

The Brazilian market, with its creativity and complexity, constantly inspires us with challenging projects — and it is precisely in this scenario that HYLINE stands out.

Our vocation for innovation allows us to offer solutions for the most audacious proposals, without compromising on aesthetics and quality of delivery.

Over almost 12 years of operation, we have built solid partnerships throughout Latin America with internationally renowned firms, such as Jacobsen Arquitetura, Bernardes Arquitetura, Roberto Migotto, David Bastos, Marcio Kogan, Anastassiadis, Arthur Casas and SAOTA, etc.

Building this relationship of trust requires time, dedication and consistency — and it is gratifying to realize that, in the end, everyone shares the same passion for the challenge, demanding the same level of technical rigor and excellence that we have as a principle.

Having a team that is passionate about what they do, highly qualified, is what allows us to transform each project into a unique delivery.

Our clients know that we take care of their homes as if they were our own.”

*Bruno Nardelli, Commercial Director HYLINE BSI Brazil*

## HYLINE BUILDING SYSTEMS FRANCE SAS

“Our true mission is to empower architects to create HYLINE BUILDING SYSTEMS BRAZIL without limits when it comes to large glazed spans.

Every day, we make our technological experience, minimalist design and vast portfolio of projects carried out around the world available to you.

Since each creation is unique, this close collaboration allows us to continually innovate, ensuring that the result is never a standardized product.

Our end customers are looking for a discreet and exclusive form of luxury.”

*Georges Perelroizen, President HYLINE Building Systems France SAS*

## HYLINE BUILDING SYSTEMS UK

“What I've come to value most at HYLINE UK is how our involvement often begins with a challenge — a design ambition that seems almost impossible to realise.

But with the support of our team and the intricate, highly engineered solutions only HYLINE can offer, we consistently help architects and clients overcome those limits.

We don't just solve problems — we raise aspirations and deliver uncompromising results.

It's through this close collaboration, rooted in trust and shared vision, that we turn complex ideas into beautifully executed realities.”

*Darren Long, General Manager UK*

## BBG FR

“Operating in the French market, BBG France stands out for its ability to carry out integral works, which simplifies logistics for architects and builders.

This commitment is achieved by investing in teams that, in addition to installing aluminium and iron frames, can also provide façade cladding and locksmith services.

More than just installing aluminium frames, we are a team that works in close harmony with our clients, aiming to exceed their expectations.”

*Daniel Araújo, General Manager BBG FR*

# WE ARE HYLINE

## HYLINE MARBELHA

“At HYLINE Marbella, we work side by side with architects and clients to co-create tailor-made solutions that reflect the unique vision of each project.

Collaborations with renowned architects such as Diego Tobal and AMES are a testament to how we integrate early in the design process, offering technical insight and flexibility to bring ambitious ideas to life.

Our approach is rooted in trust, proximity, and a shared commitment to excellence, combining local involvement with an unparalleled attention to detail and impeccable customer service that define HYLINE.”

*Paulo Pucci, Commercial Director HYLINE Marbella*

## HYLINE IBERIA

“Working with HYLINE goes far beyond a simple business relationship — we make a point of establishing a relationship based on trust and mutual commitment.

We strive to make each partner feel that they are part of the solution, actively collaborating, combining synergies and skills to achieve the best possible result, both functionally and aesthetically.

We value every challenge that is presented to us, as we have the ability to respond to the most demanding expectations without ever compromising quality.”

*Dominique Maciel, General Manager HYLINE Iberia*

## HYLINE BUILDING SYSTEMS EAST

At HYLINE, we believe that technical excellence only makes sense when it serves architectural vision.

That's why we offer architects state-of-the-art framing solutions — with the slimmest profiles on the global market — ensuring total symmetry and exceptional performance. But for each project to truly reach its full potential, our presence is essential from the very first sketch.

We work side by side with the architect from the design phase, to understand the essence of the concept, the cultural context of the location, client needs, and ergonomic principles involved.

This close dialogue allows us to align expectations, share expertise, and find, together, the most suitable solution.

We coordinate with the full team of consultants to ensure that every detail contributes to a flawless final experience. Once all parameters are defined, we move into the technical phase with complete clarity.

The conclusions are passed on to our technical department, which oversees implementation through to on-site completion — ensuring that each project remains faithful to the original vision.”

*Pavlos Vatavalis, President HYLINE Building Systems East*
