## COMPLETE PROFESSIONAL SOLUTIONS

## ABOUT US

For over 20 years, Best Tools has stood for continuous growth, professionalism, and partnerships built on trust. We have grown steadily, adapted to market dynamics, and become a trusted reference partner for our clients.

We provide complete nationwide coverage – from consultancy and sales to after-sales services, ensuring prompt support and solutions tailored to each project.

We are actively expanding internationally, with new branches currently opening in the Republic of Moldova, Hungary, and North Macedonia.

Best Tools operates through two specialized divisions:

**Energy** – generator sets, energy storage systems, UPS systems, lighting towers, data center solutions, construction equipment, etc.

**Environment** – complete waste management systems, sanitation equipment, multifunctional machinery, industrial cleaning equipment, etc.

# GENERATOR SETS

Rehlko is one of the world's leading manufacturers of generator sets, recognized for reliability, premium quality, and performance in the most demanding operating conditions.

With over 100 years of experience, Rehlko develops energy solutions that support and improve everyday life, providing control over how energy is produced and used – whether for homes, hospitals, or critical infrastructure.

The portfolio includes a complete range of generators, from 1 kVA to 4500 kVA, designed to meet the most demanding industrial and commercial applications.

Rehlko stands for stability through secure energy sources and reliable back-up solutions. It means independence from outdated centralized grids. It means confidence in a future powered by clean and high-performance energy solutions.

Through continuous innovation and a strong commitment to sustainability, Rehlko builds the energy resilience the world needs – today and tomorrow.

Best Tools Company has been the exclusive official Rehlko partner in Romania for over 15 years, distributing the complete portfolio of this globally renowned manufacturer.

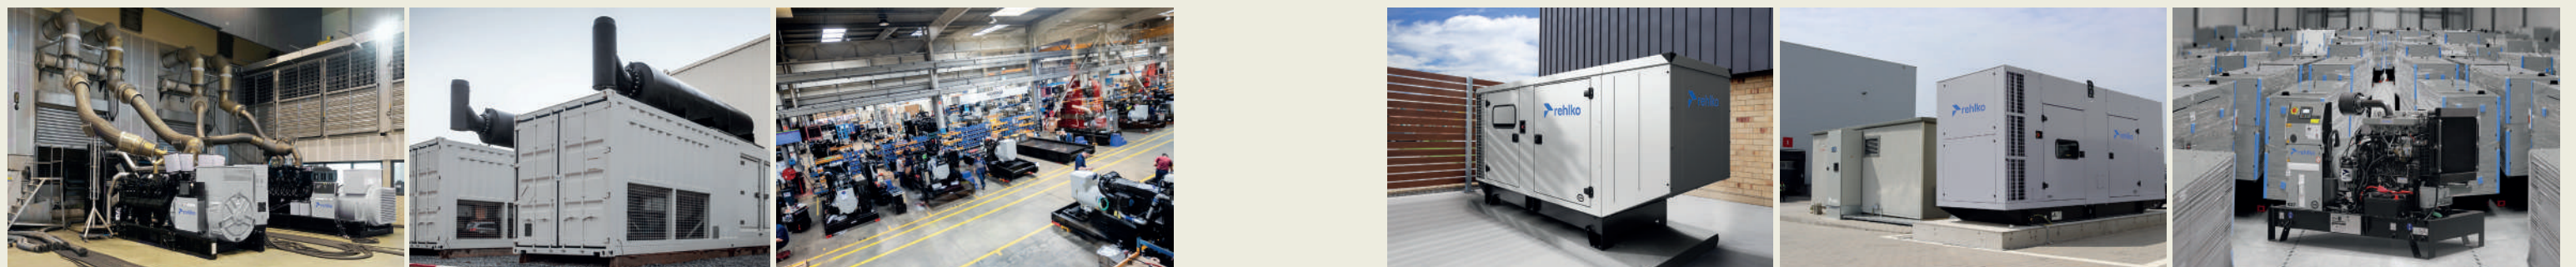

The experience gained from thousands of projects enables us to deliver more than just equipment – we provide specialized consultancy, properly sized solutions, and technical support tailored to each application.

We ensure comprehensive service and after-sales support, rapid interventions, genuine spare parts, and warranty assistance, with nationwide coverage and presence in neighboring countries.

By combining Rehlko's technological excellence with Best Tools' local expertise, we deliver safe, efficient energy solutions designed to meet the most demanding requirements.

Authorized Distributor

# GENERATOR SET RENTALS

Best Tools Company owns one of the newest generator rental fleets, featuring low operating hours and recent manufacturing years.

Our fleet includes **over 150 generator sets and lighting towers**, with power ratings ranging from 10 kVA to 1250 kVA, with synchronization capability for complex applications and high power demands.

The equipment is suitable for any type of application: events, construction sites, industrial sector, critical applications, military field operations, and emergency situations.

The industrial generators in our fleet are **Rehiko** units, meeting the highest international standards for soundproofing, fuel efficiency, and emission levels.

Our experience in generator rentals is solid – with over 5,000 projects successfully managed over time.

We provide **complete services**, from technical consultancy and proper sizing to delivery, installation, commissioning, auxiliary equipment, and 24/7 technical assistance, anywhere in Romania.

# DATA CENTERS

Best Tools' experience in developing and implementing data center solutions is continuously expanding.

Building a Data Center is a complex process that requires solid technical expertise, rigorous planning, and high-performance technologies. When a well-prepared team and a comprehensive portfolio of solutions form the foundation of a project, the result is secure, scalable, and future-ready.

Best Tools provides either complete data center solutions or dedicated energy backup systems, tailored to critical requirements for continuity and safety.

Over the past 15 years, we have installed more than **50 MW** of backup power for such projects in Romania.

Our close partnership with **Rehiko** – one of the most important global players in the data center market – represents a major strategic advantage, ensuring access to cutting-edge technologies and international performance standards.

## ENERGY STORAGE SYSTEMS

Best Tools Company distributes and installs a complete range of Battery Energy Storage Systems (BESS), with a focus on commercial, industrial, and grid applications.

We provide integrated solutions tailored to each project – from consultancy and technical sizing to delivery, installation, commissioning, and after-sales services. Our goal is to optimize energy consumption, increase energy independence, and ensure continuity of supply.

### Intelligent Energy Control

Our portfolio also includes advanced Energy Management System (EMS) solutions, such as PowerKconnect, compatible with almost any storage system, including those already installed, regardless of the hardware solutions used.

PowerKconnect is one of the most advanced energy management systems available. It enables real-time monitoring, optimization, and control of energy flows, maximizing investment efficiency and the overall performance of the system.

## UNINTERRUPTIBLE POWER SUPPLY (UPS) SYSTEMS

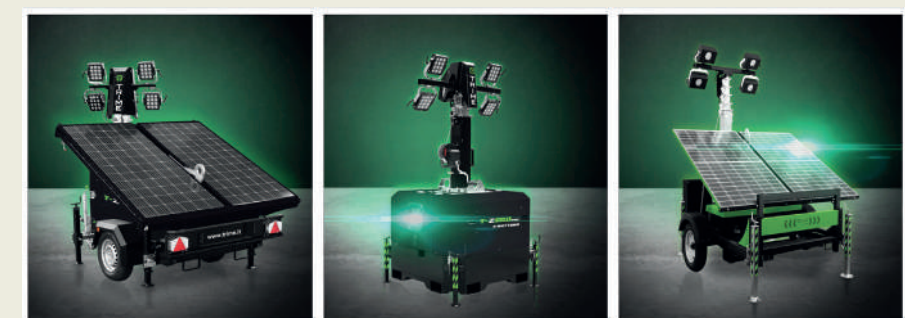

Best Tools distributes the complete range of Riello UPS systems in Romania. Riello Elettronica, part of the Riello Industries Group, is one of the world's leading manufacturers of uninterruptible power supplies, setting new standards year after year in quality, performance, and reliability.

### LIGHTING TOWERS

Best Tools distributes a complete range of lighting towers manufactured in Europe, designed for a wide variety of professional applications.

From hybrid and solar-powered solutions to plug-in and battery-powered lighting towers, our portfolio covers all requirements in terms of efficiency, mobility, and sustainability.

We deliver reliable solutions anywhere in Romania and neighboring countries, supported by dedicated technical assistance and comprehensive services.

# CONSTRUCTION EQUIPMENT

The department responsible for the distribution of construction equipment has been part of Best Tools Company since its establishment over 20 years ago. Our experience in the field is undeniable, and the suppliers we represent need no introduction:

## PROBST

For more than 50 years, Probst has stood out as a leading and highly innovative company in the development and production of paving installation and handling equipment. The German company distinguishes itself through the exceptional attention given to every detail that underpins the quality of its products.

## CONTEC

For over two decades, the use of blasting, grinding, milling, and polishing equipment manufactured in Germany by Contec has enabled specialized companies to save time and financial resources in complex operations. Milling, blasting, and polishing equipment is used for repairing and maintaining concrete surfaces, refurbishing floors made of various materials, removing protective layers, road rehabilitation works, and many other operations.

## SWEPAC

The Swedish manufacturer SWEPAC offers a complete range of light compaction equipment: single-direction and reversible vibratory plates, tamping rammers, vibratory rollers, etc.

# MILLER ELECTRIC GLOBAL LEADER IN WELDING EQUIPMENT MANUFACTURING

With a rich history spanning nearly a century and a continuous drive for innovation, Miller has become the world's leading manufacturer of welding equipment.

Best Tools Company distributes the complete range of equipment from the Wisconsin, USA-based manufacturer:

- MIG-MAG power sources with advanced arc processes, up to 800 A
- TIG power sources from 160 A to 800 A AC/DC
- Submerged arc welding power sources and complete automation systems
- Induction heating equipment

Miller equipment is suitable for any type of application requiring welding. With these welding solutions, projects can be carried out in industries such as petrochemical, shipbuilding, mechanical installations, pipeline construction, pipe manufacturing,

ENVIRONMENT

# BUCHER MUNICIPAL

Best Tools Company is the exclusive Bucher Municipal distributor in Romania. As a result of our collaboration with the renowned Swiss manufacturer, Best Tools distributes street sweepers, snow removal equipment, as well as multifunctional municipal cleaning machines.

Bucher Municipal is a global leader in the production of street sweeping equipment. With a complete range of machines, from compact sweepers to superstructures mounted on almost any type of truck chassis, with capacities ranging from 1 cubic meter to 8 cubic meters, Bucher covers virtually any application: indoor and outdoor parking areas, shopping centers, factory premises, sidewalks, narrow streets, construction sites, as well as boulevards, highways, and airport runways.

Regardless of size or type, the sweepers deliver extremely high suction power, are robust and efficient, and can operate in demanding conditions. They can also be equipped, at the end customer's request, with winter service attachments.

# SNOW REMOVAL EQUIPMENT

The Bucher Group also manufactures equipment and machinery for winter road maintenance. Best Tools distributes a complete range of snow plows, salt spreaders, de-icing solution spreaders, and snow blowers.

Reliability, long service life, and a low total cost of ownership are the key characteristics of this equipment.

## ELECTRIC MUNICIPAL CLEANING EQUIPMENT

Bucher Municipal manufactures fully electric versions of all types of municipal cleaning equipment within its portfolio.

Best Tools therefore distributes in Romania fully electric compact sweepers, truck-mounted sweepers, and salt spreaders. Upon customer request, the superstructures can be mounted on electric trucks – eliminating exhaust emissions and significantly reducing noise pollution.

ENVIRONMENT

ENVIRONMENT

ENVIRONMENT

# Multihog®

**One machine, one operator, countless applications** – a single Multihog unit can replace multiple machines, optimizing operating and maintenance costs through the use of over 50 different attachments for various applications throughout the year.

Designed for maximum performance and efficiency, Multihog machines are robust solutions for the maintenance of public spaces, municipal activities, industrial facilities, and many other applications, delivering adaptability, productivity, and reduced costs.

## ENERGREEN

Energreen develops multifunctional machines specifically designed for road and roadside maintenance, forestry works, green space rehabilitation, construction, and watershed maintenance.

The portfolio includes two main ranges: Robo – remote-controlled machines operated from distances of up to 150 meters, ideal for difficult or high-risk areas. ILF – high-performance equipment equipped with telescopic arms of up to 17 meters, designed for complex operations and maximum productivity.

## UNIMOG

Best Tools Company provides bodywork customization and equipment fitting services for Unimog chassis. These can be transformed, for example, into outstanding snow removal vehicles by equipping them with a salt spreader and snow plow, as well as into various other machines for municipal and street maintenance. Its multifunctionality is widely recognized in the industry. Reliability, quality, high power output, and the wide range of applications in which it can be used make Unimog a benchmark multifunctional vehicle.

## TSM

TSM urban equipment is suitable for cleaning all types of spaces, both during the day and at night. Equipped with electric motors, these machines are very quiet and emission-free.

Thanks to their compact dimensions, the sweepers and vacuum units are ideal for efficiently cleaning parking areas, courtyards, sidewalks, industrial zones, and generally hard-to-reach areas.

## DIGITALIZED ECO ISLANDS

Digitalized eco islands are available in several configurations: underground platforms, semi-underground containers, and above-ground platforms.

Regardless of type, they can be equipped with multiple intelligent systems to enhance efficiency, such as card-based access, weighing systems, fill-level alerts, and more.

Eco islands can also be integrated into the smart system of the urban area in which they are installed (IoT). Through dedicated software, the sanitation operator can be notified when a container is close to full capacity and informed about the type of waste fraction collected. Moreover, the software can generate efficient routes for garbage trucks operating in the field.

Digitalized eco islands are the ideal alternative to traditional waste enclosures, offering numerous benefits: seamless integration into any environment, elimination of unpleasant odors, reduced space occupancy, mitigation of insect and rodent issues, and a significant reduction in vandalism risk.

## GARBAGE TRUCKS AND WASTE COMPACTORS

With over a decade of experience in supplying high-performance equipment for **waste collection and compaction**, Best Tools offers a complete range of machinery dedicated to this sector.

We provide garbage trucks for all types of applications – from standard models used in large-scale collection services to advanced solutions such as crane-equipped garbage trucks and split-body garbage trucks, designed for efficient separate waste collection.

To optimize the waste management process, we also offer a complete range of compactors, available in both mobile and stationary versions, tailored to specific operational requirements.

All collection equipment distributed by Best Tools is manufactured in the European Union, meeting the highest standards of quality, safety, and efficiency.

ENVIRONMENT

ENVIRONMENT

# WASTE MANAGEMENT

Best Tools provides complete solutions for the efficient and sustainable management of waste, covering the entire process – from collection to treatment and recovery.

Our portfolio includes digitalized eco islands, garbage trucks, and compactors, as well as equipment and facilities for every stage of the process: **LINDNER** waste shredders, civic amenity sites (**CAV**), transfer stations, sorting stations, and mechanical-biological treatment (**MBT**) plants.

We also install anaerobic digestion systems, bio-drying solutions, and CLO-type compost production systems within MBT facilities (in collaboration with **ENTSORGA**), as well as a full range of customized recycling and recovery systems.

We integrate modern technologies aligned with legislative requirements and sustainability objectives, building efficient, scalable systems that are ready for the future.

# PROJECTS IMPLEMENTED IN ROMANIA

Best Tools is a true project integrator in the field of waste management, providing complete professional solutions – from the design of various types of facilities to equipment delivery, installation, and site development. We manage every stage of each project with responsibility and solid technical expertise.

Over the past decade, we have completed hundreds of projects in Romania, with many more currently in progress. We have installed hundreds of digitalized eco islands, sludge composting plants, civic amenity sites, fixed and mobile sorting stations, green waste composting facilities, and dedicated textile waste collection systems.

The experience we have gained enables us to deliver efficient solutions tailored to local needs, actively contributing to the modernization of Romania's waste management infrastructure.

## CLEANING EQUIPMENT

### A COMPLETE RANGE OF CLEANING MACHINES AND EQUIPMENT FOR INDUSTRIAL APPLICATIONS

The Cleaning Equipment Department within Best Tools Company represents in Romania and neighboring countries a large number of international manufacturers. As in all other departments, suppliers have been selected based on the company's core principles, representing brands known for their high-quality cleaning equipment.

Best Tools distributes:

- RCM floor sweepers and scrubber-dryers, available as walk-behind or ride-on models. These are ideal solutions for various industrial and urban applications: shopping malls, factories, hospitals, warehouses, parks, etc.

- Mastervac industrial vacuum cleaners. Thanks to the wide product range, these vacuum cleaners are capable of meeting any suction requirement in professional and industrial environments.

- Sibilia heavy-duty vacuum cleaners. The powerful Sibilia units are ideal for industries such as metal processing, cement manufacturing, energy production, packaging, glass industry, food industry, chemical industry, mining, textile industry, and more.

In addition to the equipment listed above, Best Tools also distributes professional vacuum cleaners, professional carpet cleaning machines, and industrial high-pressure washers. Other suppliers in our portfolio include Elsea, Santoemma, Comet, and PTC.

## DISINFECTION, PEST CONTROL, AND HIGH-PRESSURE WASHING EQUIPMENT

Many cleaning machines can be adapted and transformed into equipment for disinfecting indoor and outdoor spaces simply by using the appropriate substances. At the same time, the Best Tools portfolio also includes equipment specifically designed for disinfection, pest control, and high-pressure washing operations.

**Nebulizers and atomizers** are designed for the increasingly frequent activities of disinfection, pest control, and dust suppression in outdoor spaces, making them indispensable for densely populated cities and industrialized areas.

**The high-pressure washing systems** in the Best Tools portfolio are divided into three main categories:

Portable systems, backpack-type units, ideal for high-pressure washing and disinfecting confined indoor and outdoor spaces.

Towable systems, designed as small trailers, easy to transport, capable of high-pressure washing using hot water and steam.

Vehicle-mounted systems, which can be installed in the beds of utility vehicles, making them highly efficient for operations that require frequent movement between job sites.

## SERVICE DEPARTMENT COMPLETE AFTER-SALES SERVICES

Best Tools' experience in after-sales services is extensive. It has been built through the wide range of installations and service interventions carried out by the Service Department.

We provide high-quality services both at our headquarters in Bucharest and through more than 20 mobile service units, as well as through our regional colleagues across the country.

The Service Department is fully equipped to handle any type of intervention for all equipment and machinery distributed by the company. The technicians at Best Tools Company are prepared to meet any challenge, regardless of the equipment or machinery requiring service.

Our service personnel are trained directly by Best Tools' suppliers, regularly attending training sessions organized by manufacturers throughout Europe.

Aligning the Service Department with the standards imposed by the premium manufacturers represented by Best Tools in Romania has been a key objective. Today, the department operates in full compliance with the strict requirements of our suppliers.

### Technical Support

Consultancy, warranty management, complete documentation supply, and online and phone support.

In addition, annual training sessions are held for partners and end customers, covering all ranges of equipment and machinery imported, produced, and distributed.

### Nationwide Coverage

Service interventions can be carried out both at our dedicated service facility located at the headquarters in Bucharest and anywhere in Romania and neighboring countries. Our fleet of more than 20 mobile service units is always ready to intervene nationwide. The dealer network is also continuously expanding across the country.

### Maintenance Contracts

Best Tools offers comprehensive maintenance contracts for all distributed equipment. These contracts include periodic inspections and intervention in case of breakdowns.

### Spare Parts

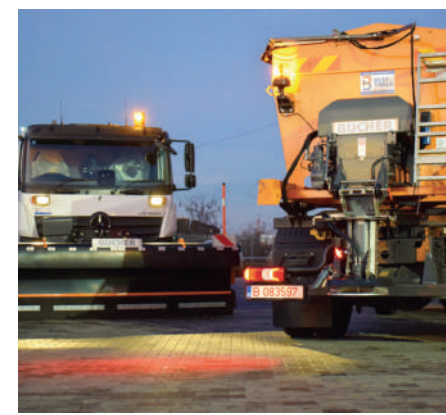

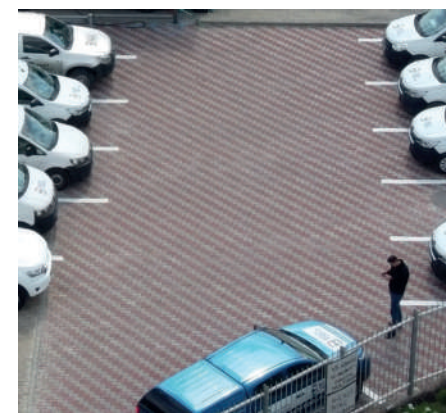

We permanently maintain a wide stock of original spare parts, as well as consumables and maintenance kits. Specialized software provided by manufacturers supplies preventive information regarding necessary replacements, thus eliminating delays.

### Operational Support

Best Tools provides project consultancy both in terms of equipment selection and sizing, as well as special conditions related to financing, transport, installation, and commissioning.

### Training

With every delivery and commissioning, Best Tools technicians provide free training for operating personnel. Advanced and specialization sessions are also organized.
